Promoting Purposeful Discourse: Teacher Research in Secondary Math Classrooms

Edited by Beth Herbel-Eisenmann and Michelle Cirillo

Contributing Authors: Tammie Cass, Courtney Cazden, Darin Dowling, Patricia A. Gronewold, Lana Lyddon Hatten, Jean Krusi, Lorraine Males, Jeff Marks, Joseph Obrycki, Catherine O'Connor, Samuel Otten, David Pimm, Angie Shindelar, Edward A. Silver

How important is discourse in the mathematics classroom? Interest in this question has grown dramatically as mathematics education has recognized the role of communication in understanding. This book presents portraits of teaching by secondary school teachers who have closely observed classroom communication, conversation, and discourse and have sought to use them to improve the quality of their teaching and their students' learning.

Sections in the book include: A Journey of Awareness and Change; Tensions, Dilemmas, and Questions in the Process of Changing Discourse Practices; and Images of Productive Discourse Practices, Selective Listening: Ignoring and Hearing Students' Voices.

This valuable professional development resource will make a great addition to any mathematics library and be used to help guide discussions about classroom teaching.
