

Improving Practice Together

A Partnership to Adapt, Implement and Study a Professional Learning Model and Build District Capacity to Improve Science Instruction and Student Understanding

Emily Weiss

Science
UNIVERSITY OF CALIFORNIA, BERKELEY

In partnership
with:

 Santa Clara Unified
School District

Stanford
GRADUATE SCHOOL OF
EDUCATION

DRL # 1720894, #1720930

Where did we start?

Teachers improved their facilitation skills, and
students improved their discourse skills

But...

Hire or DIY?

Hiring external professional learning providers to lead intensive PL programs is costly. We (**The Lawrence** & **Stanford**) wondered...

What would it look like to support a district to build its own capacity to implement an effective model of professional learning using teacher leaders, and guided by district needs and priorities?

Where did we start?

BaySci

SCUSD worked with the Lawrence and several Bay Area districts to develop plans for improvement in science instruction

Teachers improved their facilitation skills, and students improved their discourse skills

A brief video

IPT Theory of Change

**Adapt PL model
to district
context**

*Collaborative design
of intervention within
partnership.*

**PL for Teacher
Leaders at
district level**

*Building capacity to
implement model
locally as an adapted
PL program.*

**TLs implement
adapted PL
program**

*TLs supporting
ongoing PL for district
teachers.*

**Shifts in teacher
practice (non-
TLs)**

*Teachers facilitating
student science
practices (NGSS).*

**Improved
competency in
students**

*Students engaging in
science practices
(NGSS).*

A Process of Co-construction

Improving
Practice
Together

Created tools, conducted research and evaluation to provide real-time formative feedback and summative feedback; Identified research questions and created and utilized protocols that addressed the research needs associated with an iterative approach

Research
&
Evaluation
Team

UNIVERSITY OF CALIFORNIA, BERKELEY

Stanford
GRADUATE SCHOOL OF
EDUCATION

Designed,
implemented, studied,
and revised teacher
leadership capacity
building experiences
in ways that were
responsive to shifting
district needs and
priorities

Identified and implemented appropriate tools and methods for supporting specific teacher leadership roles

External Professional
Learning Team

**The
Lawrence
Hall of
Science**
UNIVERSITY OF CALIFORNIA, BERKELEY

Identified needs and potential roles for teacher leaders as district priorities and structures shifted

School District

 **Santa Clara Unified
School District**

Skills to Results

Improving
Practice
Together

Skills required of teacher leaders

- facilitate video reflection
- Model science exemplar activities, including argumentation
- lead discussions related to pedagogy
- plan ^{lead} adult learning activities
- facilitate reflection
- lead decomposition activities
- introduce research-based frameworks

Resulting goals of teacher leadership PL

- Understanding ^{rationale for} structure of Institute
 - adult learning theory
 - pedagogies of practice + other frameworks
- ② Deep understanding of argumentation
 - how? (in science? in learning?)
 - why? (in science? in learning?)
 - framework for argumentation
 - Foss exemplars/strategies
- ③ Building trust ^{community} with adult learners
 - for collaborating w/colleagues
 - for facilitating conversations around instructional practices
 - going out of comfort zone (my community will back me)
 - comfort w/ self/self-knowledge

- Understand Being able to do substantive and logistical planning:
 - Plan agenda
 - logistics for materials
 - getting materials
 - anticipating how an activity will go
 - timing
 - adjustments on the fly
 - debriefing
 - consider all the stuff under goes 1 & 2
- ⑤ Develop facilitation skills
 - listening
 - video reflection
 - protocols
 - conversations around practice
 - use resources/frameworks
 - instructional decision making in the moment/focus on goals of activity
- ⑥ Believe all teachers have room to grow + can ^{students} engage in ^{openness/willingness to engage in} lifelong learning

- ⑦ Understanding role as SMT+TL
 - develop attitude of being instructional leader
 - understand ^{multiple leadership hats} theory
- ⑧ Build science content knowledge

Teacher Leadership Development Framework

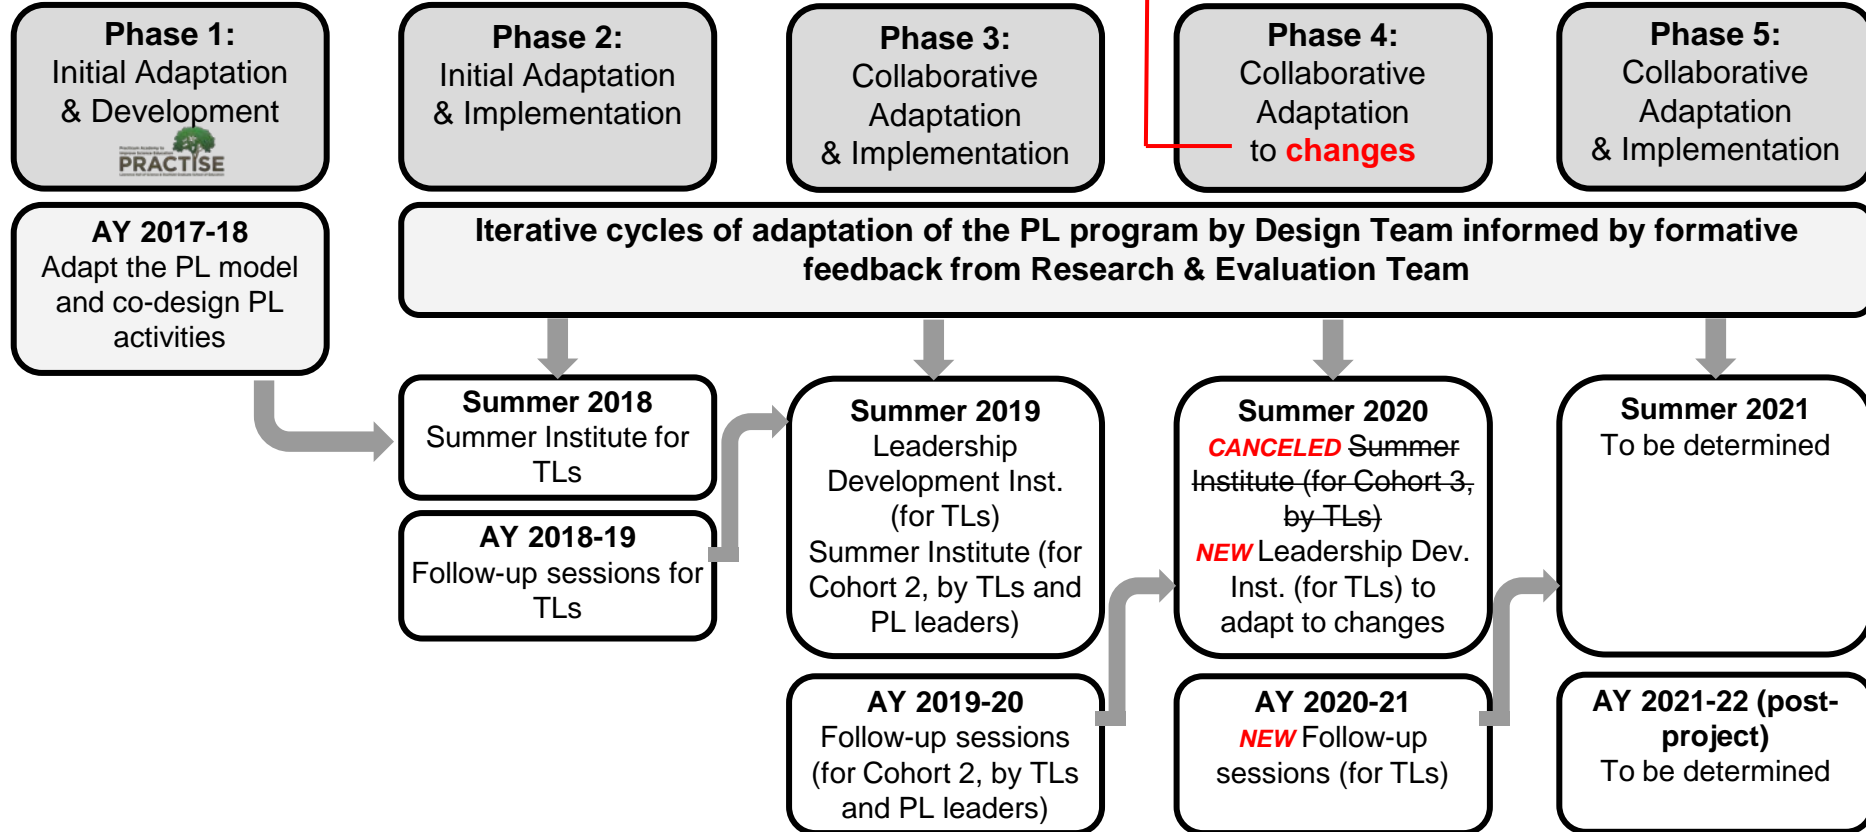

IPT Project Flowchart

New SCUSD Leadership

VISION2035

Original Research Questions

RQ1: Adaptation and Development: 1a) What modifications and adaptations to the PRACTISE PL model and resources are required for implementation by a school district? 1b) What tools and resources are needed to prepare and support TLs to implement the PL program independently?

RQ2: Implementation: 2a) How is the adapted PL program implemented by TLs in the Summer Institute and follow-up sessions during the year? 2b) What role do the PRACTISE activities and resources, and district contextual features play in TLs' implementation of the program with district teachers?

RQ3: Outcomes: 3a) How does the adapted PL program impact classroom discourse practices? 3b) What is the impact of teachers' participation in the PL program on their students' competence with scientific argumentation from evidence?

Modified Research Questions

RQ1: Adaptation and Development

1a) What modifications and adaptations to the PRACTISE PL model and resources are required for implementation by a school district?
1b) How does The Lawrence adapt activities, tools, resources and supports in order to prepare teacher leaders to implement the PL program during the COVID-19 induced shelter-in-place in the third year of the project?

RQ2: Implementation of the evolving PL program

2a) How has the adapted PL program evolved over time?
2b) What role do the activities, tools, resources, and supports to prepare teacher leaders play in the implementation of the program each year? How does this change over time?

RQ3: Outcomes of PL and Leadership Development for teacher thinking and practice

3a) How do classroom discourse practices of TLs and teachers change over time? How are these changes related to their participation in the PL program?
3b) How do TLs' and teachers' conceptions of how to teach science change over time? How are these changes related to their participation in the PL program?

RQ4: Partnership

4a) How does the partnership negotiate goals and roles, and how do partners balance priorities and commitments over time?
4b) How does the design-based approach/research-practice partnership support change in teachers' and teacher leaders' practices around argumentation and discourse?

Supporting and Maintaining the Partnership

- A commitment to the value and importance of the work.

Tools and Processes

Supporting and Maintaining the Partnership

- A commitment to the value and importance of the work.
- Good communication between all partners
 - Group interviews on the successes and opportunities for growth in terms of collaboration and communication

The Online Note-taking Tool was designed to document professional learning activities and identify potential next steps, with the intent of providing timely, actionable feedback to facilitators.

Tools and Processes

Artifact 1: First page of the note-taking tool with an example activity

10:00 Note-taking template for the Research and Evaluation team
 Day 1, week 10, 2020
 Observers and note taker:
 • Emily Brown and Sarah Smith on the template, Emily Brown, and PL team
 Participants: (names from the template)
 • PL team
 • Teachers

Don't put from slides
 (What evidence shows that learning outcomes are as well developed to participants?)
 (What are other potential outcomes that we observe PL team are developing?)
 (What evidence shows how the design learning reflects that the PL team are developing practice, modeling practice through roles, addressing practice, modeling conceptual/practical task, being scaffolded, e.g. support participants' mental learning?)
 (What are other potential methods that we observe PL team use?)

Interval	Activity	Initial description	Initial observations that contribute to answer guiding questions	Observers' thoughts, including with regard to the guiding questions
10:00	Research and PL team	When we started looking with participants to develop the whole group's knowledge as a group of one.	10:00 PL team is talking to whole group. PL team (Emily Brown and Sarah Smith) are suggesting that each group: • Research the problem of practice • Develop a plan for solving the problem and select a team • Share with other groups PL team is talking to whole group. 1. Identify each PL activity's intended learning outcome

The group starts working on fleshing out the design.

[Slides](#)
[Jamboard](#)

really struggled with the technology - she calls in her daughter to help.

and are working on the slides and made the Jamboard. They are working and raising questions to one another, as well as making sure that they are following the schedule they agreed on.

offers to be the tech support to create breakout rooms.

The group then talks about the timing for each section to stay within the 30 min.

2. Collect data and thoughts related to the PL outcome in the same document

9:58 DV gives prompt for first day: "During shelter in place, what have you missed the most?"

10:00 DV gives listening debrief questions.

10:00 DV contributes that it was hard to do with her people. "You want to share your own related experiences. 10 says that she at least wanted to agree. 10 adds in the chat that she was using body language. 12 contributes that you want to empathize and share experiences. 10 says what it was like to talk without being interrupted. 10 contributes that this works well for screen interactions, since cues for turn taking could be different. Earlier over a screen than face to face. 10 shares that he thinks that content requires spending one at a time. 10 shares that it's hard not to use body language. DV adds that people need to show that they are listening: something that takes the speaker's mind. It's having a hard time to see him face, the students do not give a lot of feedback. DV does not react to that and moves on. DV comments that sometimes there is a need to show (10) she (10) was in work the shifts with with other teachers. It was quick and missed it, she mentioned that applies to adults. They did not clearly what the different levels are (going to support other teachers and expect to support their students).

Teachers share problems on the chat (10) is helping to build confidence.

10:18 Diane debriefs the second day, again referencing their roles with adults. "As you step into leadership roles, it's a nice tool to have in your back pocket in case things get a little bit busy."

3. Quickly summarize feedback to PL facilitators during their daily debrief

Hi PL team,

Here are the R&E observations for day 6 (Emily R. and Corale):

Overall:

The framing provided at the start of the day was very helpful to us and the teachers as we transitioned to a greater focus on science content in the second week.

We notice that the levels ("apprentice" teacher level/classroom and "apprentice" leader level/PL) were both being addressed, often simultaneously throughout the day. There is evidence that the teachers contributed thoughts at both levels in the discussions and that for some it was useful (e.g. 10) kept referring to the teacher level to make sense of the discussions). We wonder if the debrief might be more supportive of the outcomes if the levels are prioritized separately (e.g. What are the implications for your practice as a teacher? and/or What are the implications for your practice as a leader?). Alternatively, we could make explicit the premise that the teacher level and leader level are mutually supportive and that many skills/processes translate between the two layers.

Watching and debriefing a video where Emily W facilitates electromagnets using a line up
 (Outcomes from the agenda)

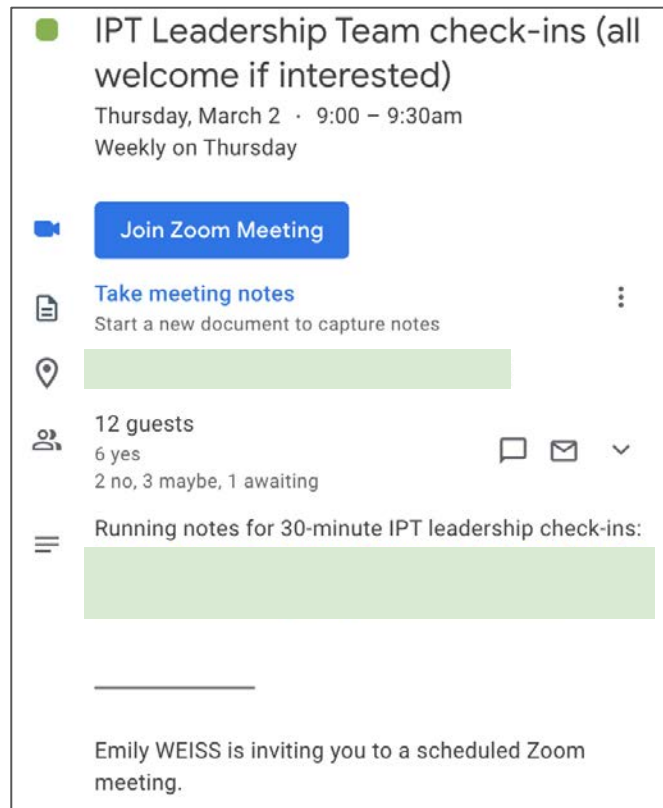

- Recognize and explain how a facilitator uses content knowledge and facilitation moves to lead a productive discussion—one that moves learners toward the normative understanding
- Increase awareness of the considerations that need to be made in the design and implementation of a session

In small groups, teachers tended to focus on the facilitation level (particular moves) rather than the design level (the question under discussion, the use of the class/lineup, the use of the poster to document thoughts). Many very important considerations about the design level came out in 10's interview of Emily, including how to research student previous conceptions about the content. Given that participants have not yet had much of an opportunity to process or practice these ideas, we aren't sure to what extent their awareness of these factors was increased.

4. Brief email summary from R&E to PL team

Supporting and Maintaining the Partnership

- A commitment to the value and importance of the work.
- Good communication between all partners
 - Group interviews on the successes and opportunities for growth in terms of collaboration and communication
- An infrastructure for ongoing partner meetings

IPT Leadership Team check-ins (all welcome if interested)
Thursday, March 2 · 9:00 – 9:30am
Weekly on Thursday

Emily WEISS is inviting you to a scheduled Zoom meeting.

Supporting and Maintaining the Partnership

- A commitment to the value and importance of the work.
- Good communication between all partners
 - Group interviews on the successes and opportunities for growth in terms of collaboration and communication
- An infrastructure for ongoing partner meetings
- Liaison(s) whose role is to communicate within and across all teams (boundary crosser)

Learnings about Partnerships

The context in which a partnership is established is likely to change, and projects will need to be ready to learn how to adapt in a flexible manner that sustains the value of the work in a changed or changing context.

- It is not uncommon for school district leadership to change, and for there to be an associated change in district priorities.
- For our project, like many others working with schools, the pandemic forced a re-evaluation of teacher and leader needs, what could be done in terms of data collection and professional learning and which aspects of the work might be most valued.
- It is important to be nimble and willing to redefine overall project goals and refocus activities.

Remember, partnerships involve humans, and people are complicated. We're also working with people who exist in a context different from our own—different pressures, priorities, needs, concerns, and timelines.

Thank You!
